## PROJECT(S)

### EXPENSE TRACKER APP | FLUTTER | DART : LINK
- I excelled in developing an Expense Tracker application using Flutter and Dart, strategically implementing a REST API with the http package for seamless backend communication. Leveraging Firebase ensured real-time data synchronization, elevating scalability. The user-friendly interface and dynamic REST API capabilities make it a highly efficient solution for users to manage personal expenses with ease.

### QUIZ APP | FLUTTER | DART : LINK
- I created a quiz app using Flutter and Dart, providing an engaging and interactive platform for users to test their knowledge. This app allows users to participate in quizzes, answer questions, and receive instant feedback on their performance.
